PART 1 CORRESPONDENCE WITH SHPO AND ACHP

(This page intentionally left blank)

GSA Mid-Atlantic Region

October 6, 2011

Ms. Andrea Kampinen
Office of Review and Compliance
Virginia Department of Historic Resources
2801 Kensington Avenue
Richmond, VA 23221

Re: Section 106 Consultation
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Ms. Kampinen:

The U.S. General Services Administration (GSA) and the Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). GSA will acquire the site, conduct the environmental studies, and provide construction procurement, construction management, commissioning and other services necessary to complete the project for DOS. GSA is the lead agency for Section 106 consultation for this project. This proposed project is partially funded by the American Recovery and Reinvestment Act (ARRA).

The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities.

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. The Site Evaluation process included the following assessment steps and basic site requirements:

- Step 1: Public Ownership, minimum acreage, ability to support 24/7 operations
- Step 2: Developable area and compatible surroundings
- Step 3: Feasibility Study
- Step 4: Environmental Impact Statement & Master Planning (current step)

The proposed project is an undertaking subject to Section 106 Consultation. GSA would like to formally initiate Section 106 consultation at this time in accordance with 36 CFR § 800.3. GSA will be initiating an Environmental Impact Statement (EIS) in compliance with the National Environmental Policy Act (NEPA) that will culminate in a Record of Decision (ROD). In accordance with 36 CFR § 800.8(c), GSA intends to use the process and documentation

U.S. General Services Administration
The Strawbridge's Building
20 North Eighth Street
Philadelphia, PA 19107-3191
www.gsa.gov

required for the preparation of an EIS and ROD to comply with section 106 in lieu of the procedures set forth in §§ 800.3 through 800.6.

At this time, the Area of Potential Effects (APE) for this undertaking includes the parcels of land made available to DOS and GSA by the Virginia Army National Guard and Nottoway County located inside the boundaries of Fort Pickett. Please see Attachment 1 for an overview map of Fort Pickett with the two subject parcels, labeled as the LRA and 21/20 parcels, identified. As identification and scoping efforts commence, GSA and our cultural resource consultant, TEC, Inc., will identify additional layers of APE, including but not limited to direct effects, visual effects, audible effects, and other indirect effects.

As a part of the third step in the Site Evaluation Process, GSA and DOS conducted a Feasibility Study at Fort Pickett that included an investigation of all known conditions on the property, including a review of known historic resources and prior cultural resource investigations. Please see Attachment 2 for the cultural resource section of the Feasibility Study. The Feasibility Study survey was limited to the subject parcels themselves, and GSA is aware that the APE will likely include areas located outside the boundaries of Fort Pickett. Additional identification and assessment efforts will be conducted as a part of the EIS and in consultation with your office and other consulting parties. A work plan developed by TEC, Inc., for the identification of and assessment of effects on archaeological resources for this undertaking is attached for your review and comment (Attachment 3).

At this time, GSA has identified a preliminary list of potential consulting parties we will be contacting with invitations to be consulting parties for this undertaking. Please see Attachment 4 for the list. We would welcome any additions to this list that your office may have. We assume that we will be adding consulting parties to this list via public outreach and interaction during the NEPA process, and that some invited parties will choose not to participate.

We look forward to working with your office on this undertaking. We would like to set up an early consultation meeting in the near future with your office, the cultural resource personnel from Fort Pickett, our consultant, and the ACHP to discuss the project, planned Section 106 approach and schedule, consulting parties, and the work plan for identification and assessment. Scoping for NEPA will commence with a public scoping meeting to be held October 18, 2011 from 6:30pm-8:30pm at the Blackstone Armory, 1008 Darvills Road, in Blackstone, Virginia. We assume that there will be additional outreach and interaction with the consulting parties throughout the process outside of the planned NEPA public involvement process.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

Donna Andrews
Acting Regional Historic Preservation Officer
Public Buildings Service

Attachment 2 – Fort Pickett Feasibility Study, Cultural Resources Section

Cultural Resources

Cultural resources currently listed on, or potentially eligible for, nomination to the National Register of Historic Places (NRHP) constitute the focus of the following assessment of cultural resources. The eligibility of a cultural resource for the NRHP is dependent upon the resource’s "...quality of significance in American history, architecture, archaeology, and culture present in districts, states, buildings, structures, and objects of state and local importance that possess integrity of location, design, setting, materials, workmanship, feeling, and association" (36 CFR §60.4). The cultural resource must have a level of significance that meets one or more of the Criteria for Evaluation established by 36 Code of Federal Regulations (CFR) 60.4 to be considered eligible for nomination to the NRHP.

A file and literature review through the Fort Pickett Cultural Resources Program and the Virginia Department of Historic Resources (DHR) Data Sharing System was conducted by TEC Inc. cultural resources personnel for the 21/20 and LRA parcels within Fort Pickett in September 2010. Five investigations resulting in the recordation of cultural resources sites have been conducted within the two parcels, including two Phase I archaeological surveys and three architectural historic properties surveys (Table 3.29).

Fort Pickett and DHR records indicate that a historic district has been recorded in the 21/20 parcel. (Table 3.30) Within the LRA parcel five cultural resource sites and one historic district have been recorded previously. (Table 3.30)

The VAARNG has conducted a study of architectural resources at the Fort Pickett Post and has found that a historic district eligible for listing in the NRHP is not present because the site and structures have experienced a loss of integrity. VAARNG notified DHR of this finding and submitted a letter and supporting documentation, in accordance with Section 110 of the National Historic Preservation Act. On October 13, 2010, DHR signed a statement of concurrence that the historic district is not eligible for listing in the NRHP.

Camp Pickett is a component of the Fort Pickett historic district and encompasses

the entire Post. Camp Pickett was established in 1941. In 1974, the Post’s name was changed to Fort Pickett. Camp Pickett includes 306 contributing buildings and structures and 110 noncontributing buildings across the entire existing Fort Pickett facility. The boundaries of historic Camp Pickett encompass both the entire 21/20 parcel and the entire LRA parcel. No known contributing or non-contributing historical and cultural resources are present within the 21/20 parcel. Several contributing and non-contributing resources are present within the LRA parcel.

Previously recorded cultural resources on the two parcels, and recommendations on eligibility for the NRHP, are listed in (Table 3.30).

Table 3.29 Previous Cultural Resource Investigations

Report Number	Year	Author	Title
LRA Parcel			
N/A	2009	Moffett, Simone	Architectural Survey Conducted at Fort Pickett, Blackstone, Virginia
N/A	1998	WMCAR	Phase I Archaeological Survey of Cantonment Area Excess Properties at Fort Pickett, Nottoway County, Virginia
N/A	1997	Botwick, Brad and Debra McClane	Phase I Archaeological Survey of Selected Locations in the Cantonment Area at Fort Pickett, Nottoway County, Virginia

Report Number	Year	Author	Title
NT-9	1995	WMCAR	Cultural Resource Assessment of Fort Pickett, Brunswick, Dinwiddie, and Nottoway Counties, Virginia
NT-8	1977	Godburn, Mary Cecilia	Historic Properties Survey, Fort Pickett, Virginia
21/20 Parcel			
N/A	2009	Moffett, Simone	Architectural Survey Conducted at Fort Pickett, Blackstone, Virginia
NT-9	1995	WMCAR	Cultural Resource Assessment of Fort Pickett, Brunswick, Dinwiddie, and Nottoway Counties, Virginia
NT-8	1977	Godburn, Mary Cecilia	Historic Properties Survey, Fort Pickett, Virginia

Previously recorded sites within the LRA parcel include historic military camps, historic farmsteads, and prehistoric camps. One of these sites (44NT0056) is multicomponent, consisting of a historic farmstead with a Woodland (prehistoric) component. This site and two other sites (44NT0045 and 44NT0072) are recommended potentially eligible for the NRHP.

According to an archaeological predictive model completed for Fort Pickett, the entire Post, including the 21/20 parcel and the LRA parcel is considered to have medium to high potential for containing buried cultural materials. Sites generally do not exhibit surface expression at Fort Pickett (VAARNG 2008:2-9). Soil types present within the 21/20 and LRA parcels are dominated by moderately well drained to well drained sandy loams and silty loams. This suggests a potential for subsurface archaeological resources, as these soils are ideal for the preservation of archaeological resources due to the fact that they are well drained and never flood or pond. The VAARNG's 2008 Integrated Cultural Resource Management Plan recommends additional archaeological investigation at facilities with medium to high potential for archaeological deposits (2008:2-37), which is the case for Fort Pickett at a facility level and generally appears to be the situation for the 21/20 and LRA parcels in particular. Much of the 21/20 and LRA parcels has already been tested in the Phase I surveys.

Potentially eligible archaeological sites would require additional evaluation in coordination with the State Historic Preservation Officer prior to any disturbance. Three identified archaeological sites that were recommended potentially eligible for the NRHP are shown in (Figure 3.31).

It is recommended that further mandatory investigation of archaeological resources within the 21/20 and LRA parcels prior to the initiation of ground disturbing activities in areas that have not yet been tested. The purpose of further investigation would be to determine not only the presence or absence of previously unknown cultural resources subject to Section 106 of the National Historic Preservation Act, but also to evaluate any previously

03

Cultural Resources (continued)

unknown resources with regard to NRHP eligibility. The Virginia DHR, VAARNG Cultural Resource Manager, and contractor will work in conjunction to determine whether investigations might include Phase I survey of areas within each parcel with a medium to high potential for subsurface archaeological resources that have not been previously tested, and/or possible Phase II survey for sites determined potentially eligible in previous Phase I surveys. It is recommended that the Virginia DHR and VAARNG Cultural Resource Manager be consulted with regard to specific survey methods and locations that warrant further investigation within each parcel, as well as any associated avoidance, protection, and/or mitigation measures that may result from the discovery of previously unknown cultural resources.

Table 3.30 Known Cultural Resources Site and/ or Districts

Site Number	Site Type	NRHP Recommendation	Author & Date Recorded	Additional Comments
LRA Parcel				
44NT0045	Historic Military Camp	Potentially Eligible	Botwick & McClane 1997	Archaeological Resource; WWII-era tent camp w/ intact features and few artifacts present
44NT0046	Historic Farmstead	Not eligible	WMCAR 1998	Archaeological Resource; Heavily disturbed with some artifacts present.
44NT0056	Multicomponent – Historic Farmstead / Woodland	Potentially eligible	WMCAR 1998	Archaeological Resource; Minor to moderate disturbance with intact features and artifacts present
44NT0071	Woodland Camp	Not eligible	WMCAR 1998	Archaeological Resource; Minor disturbance with artifacts present
44NT0072	Woodland Camp	Potentially eligible	WMCAR 1998	Archaeological Resource; Minor disturbance with subsurface integrity - deeply buried prehistoric deposits
067-0110	Camp Pickett – Fort Pickett Historic District	Determined Not eligible	Versar 2010, Moffett 2009, WMCAR 1995, Godburn 1977	Facility-Wide Historic Resource; Total Associated Resources Facility-Wide: 306 Contributing (304 Contributing Buildings, 2 Contributing Structures) 110 Noncontributing (110 Noncontributing Buildings)
21/20 Parcel				
067-0110	Camp Pickett – Fort Pickett Historic District	Determined Not eligible	Versar 2010, Moffett 2009, WMCAR 1995, Godburn 1977	Facility-Wide Historic Resource; Total Associated Resources Facility-Wide: 306 Contributing (304 Contributing Buildings, 2 Contributing Structures) 110 Noncontributing No known contributing or noncontributing resources within 21/20 parcel.

Attachment 3 – Archaeological Investigations Work Plan

Work Plan for Phase I Survey and Phase II Identification Archaeological Investigations at Fort Pickett Virginia Army National Guard Installation

Blackstone, Nottoway County, Virginia

Prepared by:  ITEC, Inc.

York, Pa

September 29, 2011

U.S. General Services Administration
20 North Eighth Street
Philadelphia, PA 19107

THIS PAGE INTENTIONALLY LEFT BLANK

INTRODUCTION

TEC Inc., under contract to General Services Administration (GSA) will be conducting Phase I Survey and Phase II Evaluation at the Army National Guard (ANG) Fort Pickett in Blackstone, Nottoway County, Virginia (Figure 1). The Area of Potential Effects (APE) for the survey consists of approximately 810 acres (327.8 hectares) located within the LRA and 21/20 parcels at Fort Pickett. There are currently two build alternatives under consideration for the project, Build Alternative 1 and Build Alternative 2 (Figures 2 and 3). The areas of disturbance vary between the two alternatives, and the greatest extent of proposed disturbance will be surveyed.

The project acreage is based on the amount of land within these two parcels that is usable based on project needs, minus previously disturbed, steep slope (greater than 15%), and previously surveyed areas. The Phase I survey will focus on locating and identifying archaeological resources that are eligible for the National Register of Historic Places (NRHP). Phase II Evaluations will be conducted on three previously identified sites on the LRA parcel, Sites 44NT045, 44NT056, and 44NT072 (Figure 4).

Phase I Survey and Phase II Evaluation will be conducted in accordance with Section 106 of the National Historic Preservation Act (NHPA), as amended, and its implementing regulations, 36 Code of Federal Regulations 800: Protection of Historic Properties; the Archaeological and Historic Preservation Act of 1974; the *Guidelines for Conducting Cultural Resource Survey in Virginia* (Virginia Department of Historic Resources [VA DHR] 1999), and the Department of Military Affairs (DMA) *Standard Operating Procedure No. 6 for Conducting Archaeological Surveys, Standard Operating Procedure No. 7 for Curation Guidelines, and Standard Operating Procedure No. 8 for Archaeological Site Testing and Evaluation*.

I. PHASE I IDENTIFICATION SURVEY

Phase I survey will be conducted on approximately 810 acres of property on the LRA and 21/20 parcels at Fort Pickett (Figures 2 and 3). Phase I field investigations, lab work, and report production will follow the VA DHR Guidelines and DMA Standard Operating Procedures for archaeological testing. Deviations from these guidelines may be made in the field investigations as situations warrant, in consultation with the Fort Pickett Cultural Resources Program Manager and with the VA DHR, if necessary. All deviations and reasons for any changes will be detailed in project reportage.

A deviation agreed upon on September 21st between TEC and the Fort Pickett Cultural Resources Program Manager will change the requirement for the use of a grid coordinate system for recording shovel test pit (STP) locations to the use of a hand held GPS unit. Each STP location will be recorded utilizing the GPS unit and will be plotted on project mapping in GIS.

No other deviations have been agreed upon at this time.

Figure 3. Proposed Project Area Showing Archaeological Testing for Phase I Survey, Alternative 1

FIGURE REMOVED FROM PUBLIC USE

Figure 4. Aerial view of the LRA Parcel at Fort Pickett, showing the Phase II archaeological sites

PHASE II EVALUATION

Phase II evaluations will be performed at three sites previously identified through surveys on the LRA parcel. Work effort for these three sites will be presented below. Additional sites may be discovered during the current Phase I survey. GSA will attempt to avoid any sites discovered during the Phase I; however, if avoidance is not feasible, workplans will be completed for Phase II evaluation of these sites and submitted to the VA DHR and VAANG for approval.

A. SITE 44NT045

Site 44NT045 is a portion of a World War II-era tent camp, discovered by Gray & Pape in 1997. Features at the site consist of concrete pads of differing sizes. Two of the features, believed to be mess buildings, and four other features appear to correspond to buildings at the site on a period map. Additional concrete features that do not correspond to known structures on the historic map were also discovered during the survey. Over 190 STPs were placed at the site during the Phase I survey; however, only eleven artifacts were recovered, none of them reflecting significant association with camp features. The site was recommended for Phase II evaluation to determine its research potential and its significance as a military/training site.

Due to the limited number of artifacts recovered from the STPs placed at the site during the Phase I Survey, it is unlikely that additional artifacts would be discovered through further shovel testing. Research potential related to this site will likely be obtained through examination of archival records and comparison of these records to the camp layout. Additional background research will be completed to obtain information on the history and layout of Site 44NT045. Maps, files, installation records, and other documents pertaining to the location of built features will be used to compare the documented remains at the site in an attempt to identify individual buildings. Research will be conducted on the general layout and functions of World War II-era camps. Layout of the camp will be compared to the typical layout of training camps of this period. Research may also assist in the identification of military units that may have utilized the camp facility. Sources for additional information may include photographs, maps, aerial photos, diaries, soil surveys, letters, official Army standards and guidelines, and other Army records.

The site will be cleared of obstructing vegetation and a grid system will be established. TEC will attempt to rediscover each of the features associated with the camp that were previously mapped and will determine if any additional features are located on the site. Each of the features will be mapped in with a transit and located on project mapping. The location of site features and comparison to historic maps may provide spatial information on the arrangement of field camps of this type.

The camp site will be metal detected in order to determine if any previously undiscovered metal objects are located at the site, including buttons, coins, bullets, or soldier's personal items. In addition, this survey will attempt to identify any undiscovered features containing metal objects, such as trash or latrine pits. All metal objects and/or features identified during the metal detector survey will be mapped utilizing a transit. A 50% sample of metal detector hits will be excavated and a 25% sample of features discovered through the metal detecting will be excavated.

B. SITE 44NT056

Site 44NT056 is a multicomponent site located by William and Mary Center for Archaeological Research (WMCAR). The site contains the foundations of a late nineteenth/early twentieth century house, standing outbuildings, and a small Woodland period campsite. Artifacts recovered from Site 44NT056 included two quartz debitage and a cord-marked Woodland period ceramic as well as historic ceramics, glass, brick, and nails.

Potential research issues for this site related to the historic occupation of the site include information regarding the farm's occupants, social and economic status, and comparison of artifacts to other similar sites in the area. Answers to these issues will attempt to add to the knowledge of subsistence level farmsteads in post-Civil War southern Piedmont Virginia. Prehistoric issues will relate mainly to determining the further research potential of the site in light of the low artifact density. Some of the main issues include the following:

- Was the farm occupied and run by lower class white tenant farmers or does the property represent an African-American post-Civil War farmstead?
- How is the socio-economic standing of the property's occupants reflected in the artifactual deposits? How do these deposits compare with other local properties of the same economic level and class?
- How do the artifacts compare with collections of urban, higher-income and higher-class properties of the same time in southern Piedmont Virginia (ie. Dietary refuse, personal objects)?

Additional background research will be completed to obtain information related to the historic portion of the site. Census, tax, and court records and deed research may identify the occupants of the property, their economic status, and uses of the property, as well as perhaps the types of crops being grown there in the late nineteenth and early twentieth centuries. Collections and reports from local properties of the period will be compared to determine similarities and differences.

Due to the fact that no radial STPs were completed during the Phase I survey of the site, additional STPs will be placed to attempt to better define the horizontal limits of the site and to potentially add to the number of prehistoric artifacts previously recovered. TEC will attempt to determine the location of the Phase I STPs, grid system, or datum so that the STPs can be supplemented; however, based on the amount of time since the Phase I survey was completed, it is possible the original testing pattern will not be identifiable. Should the original grid system be unidentifiable, TEC will establish a new grid system. It is anticipated that a maximum of 24 additional STPs will be placed at the site. Should no significant additional prehistoric artifacts be recovered from the site, testing of the prehistoric component of Site 44NT056 will be complete.

The possibility of intact sub-plowzone historic deposits exists at the site, and test units (TUs) will be placed to attempt to define the nineteenth century living surface and discover any possible features. Two 1 x 1 meter test units will be placed in the vicinity of the house foundation in order to potentially determine building techniques and the presence/absence of a cellar hole. Additional artifacts will be collected to try to further refine the dates of occupation of the house. Additional test units (up to 6) will be placed at the discretion of the field director in order to test

other features of the farm yard. In addition, should prehistoric artifacts be recovered from any of the radial STPs in greater concentrations, up to 4- 1 x 1 meter units may be placed to attempt to better define the vertical and horizontal limits of the prehistoric site and to supplement the collection of prehistoric artifacts.

TUs will be excavated in 10-cm levels within natural strata. Soil will be screened through ¼-inch hardware cloth to enhance recovery of artifacts. Data will be recorded on TU level forms (indicating at a minimum the top and bottom elevations, soil texture, Munsell soil color, degree of disturbance, and associated artifacts). Forms will include reference data for photographs, plans, profiles, and samples (e.g., ¹⁴C, flotation). In addition, detailed narrative notes concerning aspects of the excavations (e.g., methods, field conditions, in-field analysis and interpretation) will be made by supervisory staff. Photographs of TU profiles and features will be taken. Photographs will be recorded on a photograph log that documents the roll and frame number, film speed, direction, and description of the photograph.

Should features be located during the excavations, they will be numbered sequentially. A representative sample of features will be excavated (up to 18 historic and 12 prehistoric). Detailed documentation of features will include photographs and maps in both plan and profile views, and descriptions of each feature's shape and dimensions, contents/inclusions, soil texture and color, artifacts, samples, and interpretation/feature type. Feature profiles will be mapped and photographed, and the remaining feature matrix removed and screened. Samples may be retained for flotation should necessity warrant.

C. SITE 44NT072

Site 44NT072 is a Middle to Late Woodland Period camp site identified by WMCAR. The site is located on a broad ridge nose sitting above a small springhead and an unnamed tributary of Hurricane Branch. Artifacts were recovered from two STPs and include two quartz debitage and one sherd of sand or grit-tempered Woodland ceramic. Soil profiles of the site indicate that there is the potential for intact cultural deposits underlying the historic plowzone. The site was considered by WMCAR to be potentially eligible for the NRHP under Criterion D.

Due to the fact that no radial STPs were completed during the Phase I survey of the site, additional STPs will be placed to attempt to better define the limits of the site and to potentially add to the number of prehistoric artifacts previously recovered. TEC will attempt to determine the location of the Phase I STPs, grid system, or datum so that the STPs can be supplemented; however, based on the amount of time since the Phase I survey was completed, it is possible the original testing pattern will not be identifiable. Should the original grid system be unidentifiable, TEC will establish a new grid system. It is anticipated that a maximum of 12 additional STPs will be placed at the site. Should no significant additional artifacts be recovered from the site, testing at Site 44NT072 will be complete.

Should additional artifacts be recovered from the site, the STPs will be supplemented with test units. Up to 4- 1 x 1 meter units may be placed to attempt to better define the vertical and horizontal limits of the prehistoric site and to supplement the collection of prehistoric artifacts. TUs measuring 1x1 meter square will be excavated in 10-cm levels within natural strata. Soil

will be screened through ¼-inch hardware cloth to enhance recovery of artifacts. Data will be recorded on TU level forms (indicating at a minimum the top and bottom elevations, soil texture, Munsell soil color, degree of disturbance, and associated artifacts). Forms will include reference data for photographs, plans, profiles, and samples (e.g., ¹⁴C, flotation). In addition, detailed narrative notes concerning aspects of the excavations (e.g., methods, field conditions, in-field analysis and interpretation) will be made by supervisory staff. Photographs of TU profiles and features will be taken. Photographs will be recorded on a photograph log that documents the roll and frame number, film speed, direction, and description of the photograph.

Should features be located during the excavations, they will be numbered sequentially. A representative sample of features will be excavated (up to 10). Detailed documentation of features will include photographs and maps in both plan and profile views, and descriptions of each feature's shape and dimensions, contents/inclusions, soil texture and color, artifacts, samples, and interpretation/feature type. Feature profiles will be mapped and photographed, and the remaining feature matrix removed and screened. Samples may be retained for flotation should necessity warrant.

Potential research issues will focus mainly on determining the further potential of the site in light of the low artifact density recovered from the Phase I survey. Information derived from these excavations will add to the known data on inter-riverine settlement patterns during the Middle and Late Woodland Periods.

Attachment 4 – Preliminary List of Potential Consulting Parties

Sal	First Name	Last Name	Title	Organization
Ms.	Kirsten Brinker	Kulis	GSA Liaison	Advisory Council on Historic Preservation

Re: Notification of Change in Undertaking
Department of State Foreign Affairs Security Training Center
Ruthsburg Vicinity, Queen Anne's County, Maryland

Dear Ms. Kulis:

I would like to formally inform the Advisory Council on Historic Preservation of a change in the above-referenced undertaking. In 2009 and 2010 the U.S. General Services Administration (GSA) and the Department of State (DOS) considered the acquisition of a parcel of land for a Foreign Affairs Security Training Center (FASTC) at the Hunt Ray and Crismer Farms in Queen Anne's County, Maryland. Pursuit of the property in Queen Anne's County, Maryland, was abandoned in June 2010. Since that time, GSA and DOS have conducted a new four-step site evaluation process and identified a potential site in Nottoway County, Virginia. GSA will soon be initiating Section 106 consultation with the Virginia Department of Historic Resources for this revised undertaking.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Donna Andrews".

***Ref: Proposed U.S. Department of State, Bureau of Diplomatic Security
Foreign Affairs Security Training Center (FASTC)
Ruthsburg, Queen Anne's County, Maryland***

Dear Ms. Andrews:

On January 6, 2010, upon receipt of your invitation to participate in consultation on the referenced project, the Advisory Council on Historic Preservation (ACHP) requested more information from you, to determine whether our participation in consultation was warranted. On October 6, 2011, we received your notification that the undertaking changed, and that the proposed Foreign Affairs Security Training Center would not be constructed in Queen Anne's County, Maryland.

Your notification advised that a new site in Nottoway County, Virginia, was recently identified for this undertaking, and you copied the ACHP on your consultation initiation letter to the Virginia Department of Historic Resources (Virginia SHPO), dated October 6, 2011. As the General Services Administration (GSA) continues their efforts to identify historic properties and assess adverse effects at the new site, in accordance with Section 800.3(f) of our regulations, "Protection of Historic Properties" (36 CFR Part 800), please advise the ACHP if the revised undertaking will adversely affect historic properties.

Thank you for providing us with your notification on the revised plans for this undertaking, and for your efforts to avoid the adverse effects associated with the initial site. We have copied Ms. Elizabeth Cole, Maryland Historical Trust (Maryland SHPO)

Re: Land Acquisition and Development at Fort Pickett by the Department of State Foreign Affairs Security Training Center
Nottoway County, Virginia
DHR File No. 2010-1921

Dear Ms. Andrews,

On October 7, 2011, the Virginia Department of Historic Resources (DHR) received information regarding the above-referenced project for our review and comment pursuant to Section 106 of the National Historic Preservation Act of 1966, as amended. The project is partially funded through the American Recovery and Reinvestment Act (ARRA), but GSA will assume lead agency responsibilities under Section 106.

DHR understands that the U.S. General Services Administration (GSA) and the Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Security Affairs Training Center (FASTC) at Fort Pickett, Nottoway County, Virginia. The FASTC will provide training for a variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include training such as driving tracks, firing ranges, mock urban training, and explosives ranges, as well as classrooms, simulation labs, fitness center, and support facilities such as administrative offices, dormitories, dining hall, and emergency response facilities.

GSA intends to use 36 CFR 800.8(c), which allows a federal agency to use the process and documentation required for the preparation of an Environmental Impact Statement (EIS) and Record of Decision (ROD) to comply with Section 106. Thank you for notifying DHR of GSA's intent to use this provision in the regulations. We concur with your proposed Area of Potential Effects (APE) with the understanding that additional layers will be identified as identification and scoping efforts commence with regards to direct and indirect effects.

Tel: (540) 868-7029
Fax: (540) 868-7033

As you know, the Fort Pickett Historic District (DHR ID#067-0110) was recommended as not eligible for listing in the National Register of Historic Places (NRHP) by our staff in October 2010. Please keep in mind that as the additional layers of APE's develop for this project, to consider the other historic properties in the vicinity that may have the potential for effects.

We received for review the report, *Work Plan for Phase I Survey and Phase II Identification - Archaeological Investigations at Fort Pickett Virginia Army National Guard Installation, Blackstone, Nottoway County, Virginia*, prepared by TEC, Inc. in September 2011. The report states that the identification and evaluation efforts will be conducted in a manner consistent with federal and state standards and guidelines. Please note that our guidelines for survey were recently updated in October 2011. You may find our updated *Guidelines for Cultural Resources Survey in Virginia* on our website at: http://www.dhr.virginia.gov/pdf_files/Survey%20Manual-RevOct.2011Final.pdf.

With respect to the evaluation procedures, the work plan states, for example, that a representative number of features (up to 10) shall be excavated. We wish to add the caution that evaluation stops at the point when eligibility can be demonstrated. Some limited testing may be necessary to determine if the features are cultural in nature. Depending on the size of the feature, it may be preferable to bisect it and excavate only half rather than excavating the entire feature in order determine eligibility.

We also concur with your preliminary list of consulting parties and your approach to identifying additional parties; however we suggest you first contact the Virginia Council on Indians (VCI) through its staffer, Deanna Beacham. Three additional tribes are now members of the VCI, including the Cheroenhaka (Nottoway), the Nottoway and the Patowomeck. Please see the attached link, <http://indians.vipnet.org/tribes.cfm>.

We'd be happy to participate in a meeting to discuss this project at your earliest convenience. As soon you have possible dates in mind, please contact me so we can coordinate schedules. Should you have any additional questions, please contact me at (804) 482-6084, or via email at andrea.kampinen@dhr.virginia.gov.

Sincerely,

Andrea Kampinen
Architectural Historian, Office of Review and Compliance

Re: Section 106 Consultation
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia
DHR File No. 2010-1921

Dear Ms. Kampinen:

The U.S. General Services Administration (GSA) and the Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). GSA is the lead agency for Section 106 consultation for this project.

GSA initiated Section 106 consultation with your office in October 2011. Since that time, GSA's cultural resource consultant, Cardo TEC Inc., (formerly TEC, Inc.), has been conducting studies to determine the Area of Potential Effects (APE) for the proposed undertaking and to identify any historic properties located within the APE. This submission contains the results of those studies. Another submission will be made later this year detailing the assessment of effects on historic properties.

Currently, work continues on the Environmental Impact Statement (EIS) and on the master planning effort for the facility. There are two build alternatives being studied in the EIS for this undertaking. As the master plan has developed and technical studies prepared for the EIS have began to return results, the property being sought for the facility has changed in configuration. In October, the project area being studied included two parcels of land: LRA Parcel 9, consisting of 750 acres of land, and 21/20, consisting of 900 acres of land. Since October, 238 acres of land on the 21/20 parcel were retracted by the Virginia Army National Guard (VAARNG) and are no longer available for the development of FASTC. In order to maintain a property of sufficient size for the undertaking, GSA and DOS pursued other land options within Fort Pickett. Nottoway County has made available LRA Parcel 10, a 135 acre parcel of land located west of LRA Parcel 9. Use of LRA Parcel 10 is considered in Build Alternative 2. Please see Attachment 1 for the current build alternatives. These build alternatives are still subject to change as the EIS and master planning processes continue.

U.S. General Services Administration
The Strawbridge's Building
20 North Eighth Street
Philadelphia, PA 19107-3191
www.gsa.gov

Included in this package are two reports prepared by GSA's consultant, Cardno TEC Inc. The *Phase I Archaeological Survey and Phase II Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* details the results of the archaeological survey and the *Phase II Architectural Survey and Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* details the findings of the above-ground resources survey.

As a result of these investigations, GSA has determined that site 44NT0072 is eligible for listing on the National Register of Historic Places under Criterion D. Seven potentially eligible archaeological sites were identified; additional investigation is necessary to determine their eligibility if they cannot be avoided by the proposed undertaking. No eligible above-ground resources were identified.

Of the eight archaeological sites determined eligible or potentially eligible for listing on the National Register, the design team believes that six can be avoided and left undisturbed by the proposed undertaking. For the two that cannot be avoided, GSA intends to conduct Phase II investigations to determine the National Register eligibility of the sites in the coming months. As of now, the two sites identified where impacts will be unavoidable are 44NT0207 and 44NT0218. Both of these sites are historic homesteads and are described in detail in the included report. Should changes to the build alternatives result in other sites being impacted, GSA will conduct similar investigations in consultation with your office.

In October and November of 2011 GSA contacted the public and potential interested and consulting parties in writing and at a public scoping meeting held on October 18, 2011 in Blackstone, Virginia. There are currently four consulting parties for this undertaking: the Catawba Indian Nation, the United Keetoowah Band of Cherokee Indians, the Virginia Council on Indians, and the Virginia Department of Military Affairs / VAARNG. The consulting parties are copied on this and all correspondence and reports. GSA is grateful to the consulting parties for their participation and looks forward to their comments.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Re: Land Acquisition and Development at Fort Pickett by the Department of State Foreign Affairs Security Training Center – Phase I and II Cultural Resource Surveys
Nottoway County, Virginia
DHR File No. 2010-1921

Dear Ms. Andrews,

On June 4, 2012, the Virginia Department of Historic Resources (DHR) received information regarding the above-referenced project for our review and comment pursuant to Section 106 of the National Historic Preservation Act of 1966, as amended. DHR understands that the U.S. General Services Administration (GSA) and the Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Security Affairs Training Center (FASTC) at Fort Pickett, Nottoway County, Virginia. The FASTC will provide training for a variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The project is partially funded through the American Recovery and Reinvestment Act (ARRA), but GSA will assume lead agency responsibilities under Section 106.

Following GSA's initiation of Section 106 consultation in October 2011, DHR understands that the property being sought for the facility has changed in configuration. Instead of acquiring two (2) parcels - Parcel 9 (750 acres) and Parcel 21/20 (900 acres) - the project will still acquire 750 acres of Parcel 9, but will only acquire 662 acres of Parcel 21/20, and is considering an additional 135 acres of Parcel 10, located just west of Parcel 9. The two Build Alternatives being evaluated in the EIS incorporate these updated parcel configurations.

Architectural Resources

We have received for review the report, *Phase II Architectural Survey and Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia*, prepared by Cardno TEC in May 2012. We pleased to report that the survey forms met our Data Sharing System (DSS) Quality Control Standards on June 12, 2012.

As you know, the Fort Pickett Historic District (DHR ID#067-0110) was recommended as not eligible for listing in the National Register of Historic Places (NRHP) by our staff in October 2010. Of the 442 previously surveyed resources at Fort Pickett, 75 are within or adjacent to Parcel 9, 24 are adjacent to Parcel 10, and none are within or adjacent to Parcel 21/20. Within Parcel 9, the Officer's Open Dining Building No. 1615(DHR ID#067-0110-0001) was previously determined eligible for listing in the NRHP. There are no previously surveyed properties that are determined eligible within Parcel 10, or Parcel 21/20.

The intensive-level surveyed within the APE for direct effects identified three newly recorded buildings and two newly recorded structures. Located within Parcel 9, the three buildings – Building No. 396 (DHR ID#067-0110-0417), Building No. 873 (DHR ID#067-0110-0419) and Building No. 1112/1152 (DHR ID#067-0110-0420) – and one structure – Water Tower Facility No. 664 (DHR ID#067-0110-0418) – are recommended not individually eligible for listing in the VLR/NRHP and DHR concurs. Additionally, within Parcel 10, a Concrete Box Culvert (DHR ID#067-5034) is recommended not individually eligible and DHR concurs. No buildings or structures were identified within the boundaries of Parcel 21/20.

In regards to the additional “windshield survey” conducted along Military Road and West Entrance Road, we are unable to get a sense of what is located along those corridors and request that the consultant produce a table detailing the inventory of the previously surveyed resources and the additional streetscape photos along the corridors. Please make sure the table includes the name, DHR ID#, year built, brief description, and recommendation of eligibility as recorded in DSS. Please also include the corresponding maps showing the locations of the previously identified resources within the APE along these two corridors. For the streetscape photos, please no more than two photos per page and include the direction and location the photograph was taken.

Archaeological Resources

We have received for review the report, *Draft Phase I Archaeological Survey and Phase II Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia*, prepared by Kimberly M. Sebestyen, M.A., et al. of Cardno TEC in May 2012. We are pleased to inform you that the report meets the federal *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation* (48 FR 44716-44742, September 1983) and our state *Guidelines for Conducting Cultural Resource Survey in Virginia* (rev. 2011). Please see our comments regarding archaeological properties below:

Identification (Phase I) Survey. The survey resulted in the identification of sixteen (16) previously unknown archaeological sites. Based upon the results of the survey, we concur with the consultant's recommendations as presented in Table 34 on page 290 (see attached) with one exception: the Tank Trail 3, site 44NT0220. It is described as a small historic period artifact scatter located approximately 700 feet west of site 44NT0219 and the soils are reported to be somewhat disturbed. While the Tank Trail 3 Site may not be individually eligible for the National Register of Historic Places (NRHP), we recommend that the evaluation of the Tank Trail 2 Site, 44NT0219, also consider the possibility of 44NT0220's association with that site. Additional research into the ownership of the property may be more valuable in establishing a connection than further subsurface testing at 44NT0220.

Evaluation (Phase II) Survey. The survey also re-investigated three (3) previously recorded sites that were recommended eligible for the NRHP. Based upon the documentation provided in the

report, on June 19, 2012, the archaeological subcommittee of DHR's National Register Evaluation Committee met to consider the eligibility of sites 44NT0045, 44NT0056 and 44NT0072.

- Site 44NT0045 is a World War II-era tent camp. The report finds the site not eligible because of the low number of artifacts recovered and because the artifacts were not indicative of any specific group or unit. However, it was noted that the camp in general conforms to U.S. Army regulations for the layout of a camp site. While the Committee agrees with the consultant's recommendation that the further archaeological investigations would not produce important new information, the Committee notes that archaeological sites may be eligible under criteria other than D. The historic context provided is not considered sufficient to allow a determination of eligibility to be made at this time. Tent camps in Mississippi, California and South Carolina are briefly discussed. However, no mention is made of any such facilities in Virginia. It would be helpful to know if any are still extant and have been investigated archaeologically.
- Site 44NT0056 is an historic site with a prehistoric component. Based upon the documentation provided in the report, the Committee agrees with the consultant's recommendation that this site does not meet the criteria for inclusion in the NRHP due to its compromised integrity and low information potential.
- Site 44NT0072 is a small Middle to Late Woodland Period site. Based upon the documentation provided in the report, the Committee does not agree with the consultant's recommendation that this site is eligible for the National Register under criterion D. While small Woodland camps with good integrity are rare in this area, the recorded stratigraphy does not show the potential for deeply buried deposits. Moreover, no intact features were identified. Given the level of testing in relation to the size of the site, the Committee does not see that Site 44NT0072 has potential for intact features.

In summary, based upon the results of the evaluation of these three sites, we do not recommend further archaeological investigations at Sites 44NT0056 and 44NT0072. With respect to Site 44NT0045, we recommend consideration of its eligibility under Criterion A. Additional background research is needed to develop a more thorough historic context.

Furthermore, on page 75, the report mentions an isolated gravestone, apparently not found in relation to any site or artifacts; however, the stone does contain the name Smith. Given the weight of the stones and the fact that these appear to be related to a higher economic status than average, we do not agree that this should be treated as an isolated find. We recommend conducting background research to identify the ownership of Smith's with adjacent property. As family cemeteries are common in Virginia, dependent on the results of the research, stripping of the area to locate grave shafts may be warranted.

For questions regarding archaeology, please contact Ethel Eaton at (804) 482-6088 or ethel.eaton@dhr.virginia.gov. For architectural questions and any other questions, please contact me at (804) 482-6084, or via email at andrea.kampinen@dhr.virginia.gov.

Sincerely,

Andrea Kampinen

8.0 SUMMARY AND RECOMMENDATIONS

8.1 Phase I Sites

8.1.1 Summary

Phase I survey was completed by Cardno TEC from October 2011 through March 2012 at three parcels of land at Fort Pickett Army National Guard Maneuver Training Center in Blackstone, Nottoway County, Virginia. A total of 1052 acres (426 hectares) of land were surveyed and 9,804 STPs were excavated during the investigations. Sixteen previously unknown archaeological sites were discovered as part of this survey, including four prehistoric sites and 12 historic sites (Table 34). Historic sites included former locations of military barracks and housing at Fort Pickett, military equipment and trash disposal sites, former nineteenth century domestic sites, and historic trash disposal sites. Prehistoric sites included two Woodland Period camp sites and two small lithic scatters potentially associated with short term resource procurement or hunting camps. Seven of the sites were considered to be potentially eligible for the NRHP under Criteria D and were recommended for Avoidance or Additional Work. The remaining nine sites are considered to be not eligible for the NRHP due to previous disturbances, lack of integrity, or low artifact count. No further work is recommended at these sites. Each of these sites is summarized below.

Table 34. Recommendations for Phase I sites

Site Number	Site Name	Eligibility Recommendation	Action Recommendation
44NT0207	Golder House Site	Potentially eligible	Avoidance or Phase II
44NT0208	Military Site 1	Not eligible	No additional work
44NT0209	Military Site 2	Not eligible	No additional work
44NT0210	Pottery Ridge Site	Potentially eligible	Avoidance or Phase II
44NT0211	Gunn House Site	Not eligible	No additional work
44NT0212	Garnett Street Site	Potentially eligible	Avoidance or Phase II
44NT0213	Military Burn Site	Not eligible	No additional work
44NT0214	Gunn Scatter Site	Not eligible	No additional work
44NT0215	Military Mess Scatter Site	Not eligible	No additional work
44NT0216	Military Housing Site	Not eligible	No additional work
44NT0217	Sydnor House Site	Not eligible	No additional work
44NT0218	Tank Trail 1	Potentially eligible	Avoidance or Phase II
44NT0219	Tank Trail 2	Potentially eligible	Avoidance or Phase II
44NT0220	Tank Trail 3	Not Eligible	No additional work
44NT0221	Birchin Creek Ridge Site	Potentially eligible	Avoidance or Phase II
44NT0222	Firing Range Site	Potentially eligible	Avoidance or Phase II

8.1.2 LRA 9 Area I, Site 44NT0207

The location of a possible historic house site, 44NT0207, was discovered in LRA 9 Area I. Forty-four artifacts were recovered from 15 STPs in this area, which likely corresponds to a house in this location on a 1864 military map of Nottoway County (Graves) associated with "Mrs. Golder". The site appears to be located in an area of historic fill that may relate to the house.

Although no foundations or features were discovered at this site, the presence of intact soils and possible historic fill on portions of site 44NT0207 indicate the possibility for recovery of intact features related to the Golder house that could assist in the understanding of its construction or

Re: Section 106 Consultation
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia
DHR File No. 2010-1921

Dear Ms. Kampinen:

The U.S. General Services Administration (GSA) and the Department of State (DOS) are proposing to acquire and develop parcels of land for a Foreign Affairs Security Training Center (FASTC). GSA is the lead agency for Section 106 consultation for this project.

GSA initiated Section 106 consultation with your office in October 2011 and submitted draft Determination of Eligibility (DOE) reports to your office in June 2012. This submission package contains revised DOE reports, addendum DOE reports for some additional parcels, and a Phase II archaeological investigation for sites 44NT0207 and 44NT0218.

The draft DOE reports submitted to your office in June 2012 have been revised to address comments and questions posed by your office as well as comments from the consulting parties. The *Phase II Architectural Survey and Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* includes a table of previously identified resources along the Military Road and West Entrance Road corridors as well as streetscape photos, as requested (pages 10-22).

The *Phase I Archaeological Survey and Phase II Evaluation for the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* has also been revised in accordance with comments from your office. Your office requested that evaluation of west tank trail site 44NT0219 also consider an association with adjacent site 44NT0220.

The tank trail route has been revised to avoid both of these sites and no additional survey was undertaken, but the report now recommends that if additional investigation

is conducted on site 44NT0219 that parallel investigations be conducted on site 44NT0220 (pages 182-186; 304). Additional research was conducted on and a revised context provided for site 44NT0045, the World War II era tent camp (pages 195-223). The eligibility determination for site 44NT0072 has been revised in accordance with comments provided by your office (pages 289-299). The text has been revised to provide additional information about the isolated gravestone find (pages 76-77).

Since July of 2012, GSA and DOS have continued to develop the master plan for the FASTC. The loss of 283 acres of land originally offered on the 21/20 parcel was partially offset by the addition of LRA Parcel 10 to the planning process (135 acres). GSA and DOS negotiated with the Virginia Army National Guard (VAARNG) for some additional lands connecting LRA Parcel 9 and the 21/20 parcel, known as the Grid Area, and began moving ahead with plans to include this area in the master plan alternatives for the facility. In addition, project-related development is projected to occur on some parcels that will not ultimately be acquired by or come under the control of GSA and DOS. These parcels include an access drive from Military Road to the proposed main campus area on Parcel 10, a location for the relocation of the parking lot for the Officers' Open Dining Facility (DHR #067-0110-0001), and the location for a classroom adjacent to Range 8, which will continue to be operated by VAARNG. Survey reports identifying historic properties in these areas have been prepared and the *Draft Addendum Phase II Architectural Survey for Additional Parcels at the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* and *Draft Addendum Phase I Survey for Additional Parcels at the Proposed Foreign Affairs Security Training Center, Nottoway County, Virginia* are included in this package.

Also included in this package is *Draft Addendum Phase II Evaluation for the Proposed Foreign Affairs Security Training Center, Sites 44NT0207 and 44NT0218, Nottoway County, Virginia*, detailing the investigation of the two potentially eligible archaeological sites that could not be avoided by the proposed development.

Currently, work continues on the Environmental Impact Statement (EIS) and on the master planning effort for the facility. The EIS is reaching a critical juncture with the planned distribution of the Draft EIS for a 45-day public review at the end of October 2012. A public meeting to gather formal comments on the results of the Draft EIS is planned for early November 2012. Your office, the consulting parties, and the general public will all be notified of the availability of the Draft EIS and invited to the public hearing. GSA plans to formally submit sections of the EIS detailing the effects to historic resources after coming to concurrence on the identification of historic properties as the next step in the Section 106 consultation.

In June 2012 the Virginia Council on Indians (VCI), a consulting party to this undertaking, was disbanded. As VCI had acted as a clearinghouse for the eleven state-recognized tribes, GSA contacted the tribes individually to determine if any of them may be interested in participating as consulting parties. As a result of this outreach, two of the state-recognized tribes, the Cheroenhaka (Nottoway) Indian Tribe and the Nottoway Indian Tribe of Virginia, have joined the consultation for this undertaking.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

APPENDIX E
PART 2 CORRESPONDENCE WITH CONSULTING PARTIES

(This page intentionally left blank)

November 22, 2011

Mr. Ronald Roark
Nottoway County
344 West Courthouse Road
PO Box 92
Nottoway, VA 23955

Reference Potential Section 106 Consulting Party
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Mr. Roark,

The U.S. General Services Administration (GSA) and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at [http //www.state.gov/recovery/fastc](http://www.state.gov/recovery/fastc).

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district, structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is just beginning. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess

effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer) and the ACHP, consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

GSA will consider whether individuals or organizations meet the test of a demonstrated interest in the project. Those with a demonstrated interest in the undertaking may participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the undertaking's effects on historic properties [36 CFR § 800.2(c)(5)]. Consulting parties will be requested to provide their views regarding the findings and determinations of GSA, and they will be asked to provide their views within the time frames prescribed in the ACHP regulations, usually 30 days. Organizations will be asked to nominate one representative to participate on behalf of the group. For more information on the Section 106 consultation process and the role of the public and consulting parties, I encourage you to read the Citizen's Guide to Section 106 Review, available from the ACHP ([http //www.achp.gov/docs/CitizenGuide.pdf](http://www.achp.gov/docs/CitizenGuide.pdf)).

Please complete the enclosed form within 30 days of receipt of this letter and return it to GSA via mail, fax, or email. If the form is not returned within 30 days, it will be assumed that you or your organization does not wish to become a consulting party in the FASTC project at this time. This invitation is based upon your potential demonstrated interest. Plans may change or be refined as this undertaking develops, and this may affect whether you continue to have a demonstrated interest in the project. If you have any questions, please contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at [http //www.state.gov/recovery/fastc](http://www.state.gov/recovery/fastc).

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district, structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is just beginning. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse

effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer) and the ACHP, consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

GSA will consider whether individuals or organizations meet the test of a demonstrated interest in the project. Those with a demonstrated interest in the undertaking may participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the undertaking's effects on historic properties [36 CFR § 800.2(c)(5)]. Consulting parties will be requested to provide their views regarding the findings and determinations of GSA, and they will be asked to provide their views within the time frames prescribed in the ACHP regulations, usually 30 days. Organizations will be asked to nominate one representative to participate on behalf of the group. For more information on the Section 106 consultation process and the role of the public and consulting parties, I encourage you to read the Citizen's Guide to Section 106 Review, available from the ACHP ([http //www.achp.gov/docs/CitizenGuide.pdf](http://www.achp.gov/docs/CitizenGuide.pdf)).

Please complete the enclosed form within 30 days of receipt of this letter and return it to GSA via mail, fax, or email. If the form is not returned within 30 days, it will be assumed that you or your organization does not wish to become a consulting party in the FASTC project at this time. This invitation is based upon your potential demonstrated interest. Plans may change or be refined as this undertaking develops, and this may affect whether you continue to have a demonstrated interest in the project. If you have any questions, please contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Chief Adams,

The U.S. General Services Administration (GSA) and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at [http //www.state.gov/recovery/fastc](http://www.state.gov/recovery/fastc).

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district, structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is just beginning. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse

effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer) and the ACHP, consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

GSA will consider whether individuals or organizations meet the test of a demonstrated interest in the project. Those with a demonstrated interest in the undertaking may participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the undertaking's effects on historic properties [36 CFR § 800.2(c)(5)]. Consulting parties will be requested to provide their views regarding the findings and determinations of GSA, and they will be asked to provide their views within the time frames prescribed in the ACHP regulations, usually 30 days. Organizations will be asked to nominate one representative to participate on behalf of the group. For more information on the Section 106 consultation process and the role of the public and consulting parties, I encourage you to read the Citizen's Guide to Section 106 Review, available from the ACHP ([http //www.achp.gov/docs/CitizenGuide.pdf](http://www.achp.gov/docs/CitizenGuide.pdf)).

Please complete the enclosed form within 30 days of receipt of this letter and return it to GSA via mail, fax, or email. If the form is not returned within 30 days, it will be assumed that you or your organization does not wish to become a consulting party in the FASTC project at this time. This invitation is based upon your potential demonstrated interest. Plans may change or be refined as this undertaking develops, and this may affect whether you continue to have a demonstrated interest in the project. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district, structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is just beginning. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess

effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer) and the ACHP, consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

GSA will consider whether individuals or organizations meet the test of a demonstrated interest in the project. Those with a demonstrated interest in the undertaking may participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the undertaking's effects on historic properties [36 CFR § 800.2(c)(5)]. Consulting parties will be requested to provide their views regarding the findings and determinations of GSA, and they will be asked to provide their views within the time frames prescribed in the ACHP regulations, usually 30 days. Organizations will be asked to nominate one representative to participate on behalf of the group. For more information on the Section 106 consultation process and the role of the public and consulting parties, I encourage you to read the Citizen's Guide to Section 106 Review, available from the ACHP ([http //www.achp.gov/docs/CitizenGuide.pdf](http://www.achp.gov/docs/CitizenGuide.pdf)).

Please complete the enclosed form within 30 days of receipt of this letter and return it to GSA via mail, fax, or email. If the form is not returned within 30 days, it will be assumed that you or your organization does not wish to become a consulting party in the FASTC project at this time. This invitation is based upon your potential demonstrated interest. Plans may change or be refined as this undertaking develops, and this may affect whether you continue to have a demonstrated interest in the project. If you have any questions, please contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Mr. Hicks,

The U.S. General Services Administration (GSA) and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at [http //www.state.gov/recovery/fastc](http://www.state.gov/recovery/fastc).

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district, structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is just beginning. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse

effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer) and the ACHP, consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

GSA will consider whether individuals or organizations meet the test of a demonstrated interest in the project. Those with a demonstrated interest in the undertaking may participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the undertaking's effects on historic properties [36 CFR § 800.2(c)(5)]. Consulting parties will be requested to provide their views regarding the findings and determinations of GSA, and they will be asked to provide their views within the time frames prescribed in the ACHP regulations, usually 30 days. Organizations will be asked to nominate one representative to participate on behalf of the group. For more information on the Section 106 consultation process and the role of the public and consulting parties, I encourage you to read the Citizen's Guide to Section 106 Review, available from the ACHP (<http://www.achp.gov/docs/CitizenGuide.pdf>).

Please complete the enclosed form within 30 days of receipt of this letter and return it to GSA via mail, fax, or email. If the form is not returned within 30 days, it will be assumed that you or your organization does not wish to become a consulting party in the FASTC project at this time. This invitation is based upon your potential demonstrated interest. Plans may change or be refined as this undertaking develops, and this may affect whether you continue to have a demonstrated interest in the project. Dear Dr. Haire:

The U.S. General Services Administration (GSA) and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). Thank you for responding to the invitation to be a consulting party for this undertaking. We are looking forward to working with you.

Included in this package is a copy of the initiation letter GSA submitted to the Virginia Department of Historic Resources (SHPO) regarding this undertaking and the SHPO's response to the initiation letter. This represents the correspondence to date for this undertaking. The initiation letter includes information about the undertaking as well as a work plan for archaeological investigations. At this time, Phase I investigations are under way on the subject property. Based on findings in the field and potential changes to the development alternatives being studied in the Environmental Impact Statement, we expect that there will be an updated work plan for archaeological investigations and will keep you informed of changes to the project. We expect to have some results for consulting parties to comment upon in the spring or early summer.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Dear Lisa, Deanna, Susan, and Kirsten -

Please find attached a digital cc of the cover letter for the submission of the Determination of Eligibility reports for the FASTC project at Fort Pickett, Nottoway County, Virginia. As the report files are quite large, GSA's consultant has made them available for download from their ftp site. The links are located below. The easiest way to download them is to right click and select 'save link as.' Please let me know if you have any problems accessing the reports, have any questions, or need any additional information.

Looking forward to your comments.

Sorry to have to tell you all that the VCI office has been closed by the administration, and the American Indian Specialist position has been eliminated.

i understand there have been many letters of protest to no avail. Please inform our previous contacts at Fort Pickett, and thanks for all your respect for Virginis Indians in the past.

Deanna Beacham

Chief Stephen R. Adkins
Chickahominy Indian Tribe
8200 Lott Cary Road
Providence Forge, VA 23140

Re: Potential Section 106 Consulting Party
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Chief Adkins,

In November 2011, the U.S. General Services Administration (GSA) contacted all of the Virginia state-recognized tribes with an invitation to become a consulting party under Section 106 of the National Historic Preservation Act (NHPA) for the above-referenced undertaking. We did not receive any responses from the individual tribes, but the Virginia Council on Indians (VCI) did express interest in being a consulting party. In the wake of the elimination of the VCI, GSA would like to re-extend an invitation to your organization to become a consulting party to ensure that any concerns you may have about the undertaking are addressed.

The GSA and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at <http://www.state.gov/recovery/fastc>.

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district,

structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is in the identification phase. Surveys of the subject property and the surrounding area have been conducted to identify the areas which may be affected by the undertaking and to identify any historic properties, above and below ground, which may be affected. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer), consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

If you are interested in consulting on this undertaking, please return the included form or otherwise contact me to express your interest and your preferred method of contact (mail, email, etc). I will forward to you all of the correspondence and reports distributed to date. The next phase of analysis regarding historic properties is scheduled to occur over summer 2012 with results distributed in the fall. If you have any questions, please contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

PO Box 174
King William, VA 23086

Re: Potential Section 106 Consulting Party
Land Acquisition and Development
Department of State Foreign Affairs Security Training Center
Fort Pickett, Nottoway County, Virginia

Dear Chief Adams,

In November 2011, the U.S. General Services Administration (GSA) contacted all of the Virginia state-recognized tribes with an invitation to become a consulting party under Section 106 of the National Historic Preservation Act (NHPA) for the above-referenced undertaking. We did not receive any responses from the individual tribes, but the Virginia Council on Indians (VCI) did express interest in being a consulting party. In the wake of the elimination of the VCI, GSA would like to re-extend an invitation to your organization to become a consulting party to ensure that any concerns you may have about the undertaking are addressed.

The GSA and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). The FASTC will provide training for a wide variety of law enforcement and security disciplines managed by the DOS Bureau of Diplomatic Security. The FASTC is expected to train 8,000-10,000 students per year and include both hard skills training, such as driving tracks, firing ranges, mock urban training, and explosives ranges; soft skills training, such as classrooms, simulation labs, and a fitness center; and support facilities such as administrative offices, dormitories, a dining hall, and emergency response facilities. More detailed information on the FASTC program is available at <http://www.state.gov/recovery/fastc>.

GSA and DOS have conducted a four-step Site Evaluation Process and identified portions of the existing Virginia Army National Guard's Maneuver Training Center at Fort Pickett and Pickett Park in Nottoway County, Virginia (Fort Pickett) as the potential location for this undertaking. GSA is conducting analysis in compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended. Section 106 of the NHPA requires federal agencies consider the effects of their undertakings on historic properties.

In conjunction with this undertaking, GSA is identifying individuals and organizations with an interest in the FASTC project and its potential to affect historic resources. GSA is inviting you or your organization to participate in consultation regarding historic resources pursuant to the Advisory Council on Historic Preservation's (ACHP's) 36 CFR Part 800 regulations implementing Section 106 of the NHPA. A historic property is defined as a building, site, district,

structure or object, including archaeological resources, included in or eligible for inclusion in the National Register of Historic Places.

At this time, the Section 106 consultation process is in the identification phase. Surveys of the subject property and the surrounding area have been conducted to identify the areas which may be affected by the undertaking and to identify any historic properties, above and below ground, which may be affected. The goal of consultation is to identify historic properties potentially affected by the undertaking, assess effects to historic properties, and seek ways to avoid, minimize, or mitigate any adverse effects on historic properties. For this undertaking, in addition to the Virginia Department of Historic Resources (the State Historic Preservation Officer), consulting parties may include representatives of local governments, Indian tribes, and others who meet the definition of a consulting party.

If you are interested in consulting on this undertaking, please return the included form or otherwise contact me to express your interest and your preferred method of contact (mail, email, etc). I will forward to you all of the correspondence and reports distributed to date. The next phase of analysis regarding historic properties is scheduled to occur over summer 2012 with results distributed in the fall. If you have any questions, please contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Dear Chief Brown:

The U.S. General Services Administration (GSA) and the U.S. Department of State (DOS) are proposing to acquire and develop a parcel of land for a Foreign Affairs Security Training Center (FASTC). Thank you for responding to the invitation to be a consulting party for this undertaking. We are looking forward to working with you.

Included in this package is a copy of the initiation letter GSA submitted to the Virginia Department of Historic Resources (SHPO) regarding this undertaking, the SHPO's response to the initiation letter, and a review package submitted to the SHPO earlier this month. This represents the correspondence and reporting to date for this undertaking. The initiation letter includes information about the undertaking as well as a work plan for archaeological investigations. The most recent review package includes an archaeological report that identifies archaeological resources identified in the project area. At this time, Phase II investigations are under way on the subject property. We expect further findings to be available for comment throughout the summer and into the fall. If you would prefer to receive submissions in electronic form rather than hard copy, please let me know.

If you need additional information, please do not hesitate to contact me at (215) 446-4570 or donna.andrews@gsa.gov.

Sincerely,

Kirsten, Louise, Lisa, and Sue -

Please find attached a digital cc of the cover letter for the submission of the revised Determination of Eligibility reports, an Addendum DOE report, and a Phase II archaeological investigation for two sites for the FASTC project at Fort Pickett, Nottoway County, Virginia. As the report files are quite large, GSA's consultant has made them available for download from their ftp site. The links are located below. The easiest way to download them is to right click and select 'save link as.' Please let me know if you have any problems accessing the reports, have any questions, or need any additional information.

Looking forward to your comments and hope that you all are enjoying the transition into fall.

Donna
