DEPARTMENT OF STATE

PRIVACY IMPACT ASSESSMENT

*Foreign Affairs Retirement and Disability System (FARADS)*

*ITAB 523*

*28 April 2008*

Conducted by:
Bureau of Administration
Information Sharing Services
Office of Information Programs and Services
Privacy
pia@state.gov
A. CONTACT INFORMATION:

Who is the Agency Privacy Coordinator who is conducting this assessment?

Ms. Margaret Grafeld, Director
Bureau of Administration
Information Sharing Services
Office of Information Programs and Services

B. SYSTEM APPLICATION/GENERAL INFORMATION:

1) Does this system contain any personal information about individuals or *personally identifiable information? If answer is no, please reply via e-mail to the following e-mail addresses: pia@state.gov. If answer is yes, please complete the survey in its entirety.

   YES ___X___ NO ___

*The following are examples of personally identifiable information:

   • Name of an individual
   • Date and place of birth
   • Address
   • Telephone number
   • Social security, Passport, Driver’s license or other identifying number(s)
   • Education
   • Financial transactions
   • Employment, Medical or Criminal history
   • Finger print, voice print or photograph
   • Any other identifying attribute assigned to the individual

2) What is the purpose of the system/application?

The purpose of FARADS is to pay and process benefits for annuitants (or their survivors) as prescribed by Department of State regulations.

3) What legal authority authorizes the purchase or development of this system/application?

C. **DATA IN THE SYSTEM:**

1) Does a Privacy Act system of records already exist?

   Yes.

   If yes, please provide the following:

   System Name: Personnel-Payroll Records   Number: State-30

   If no, a Privacy system of records description will need to be created for this data.

2) What categories of individuals are covered in the system?

   Annuitants (former DoS employees) and/or their survivors.

3) What are the sources of the information in the system?

   a. Is the source of the information from the individual or is it taken from another source? If not directly from the individual, then what other source?
      The source of the information is personnel and payroll records and time and attendance data.

   b. Why is the information not being obtained directly from the individual?
      This information already exists in the personnel records and does not need to be recaptured from the individual.

   c. What Federal agencies are providing data for use in the system?
      US Department of Agriculture, National Finance Center (NFC)
      Social Security Agency (SSA)
      Office of Personnel Management (OPM)

   d. What State and/or local agencies are providing data for use in the system?
      None

   e. From what other third party sources will data be collected?
      Court orders provide garnishment information.
f. What information will be collected from a State Department employee and the public?

Nothing is collected from the public. Information collected from State Department employees that the payroll system collects are marital status, tax exemptions, bank information, bond information, charitable contributions information, and union dues information.

3) Accuracy, Timeliness, and Reliability

a. How will data collected from sources other than DOS records be verified for accuracy?

The Office of the Legal Advisor verifies the garnishment information. Information from an employee is verified by the Bureau of Human Resources.

b. How will data be checked for completeness?

The Bureau of Resource Management checks to make sure the information provided is complete.

c. Is the data current? What steps or procedures are taken to ensure the data is current and not out-of-date? Name the document (e.g., data models).

The Office of the Legal Advisor and the Bureau of Resource Management check to make sure the data from the source is current.

d. Are the data elements described in detail and documented? If yes, what is the name of the document?

Yes. The data elements are described in the FARADS Data Dictionary. A paper version of this dictionary is kept in IRM/OPS/SIO/APD. The most current version of this dictionary is kept online on the mainframe.

D. DATA CHARACTERISTICS:

1) Is the use of the data both relevant and necessary to the purpose for which the system is being designed?

Yes

2) Will the system derive new data or create previously unavailable data about an individual through aggregation from the information collected, and how will this be maintained and filed?
Yes. This data is maintained on the main frame using files, software, and JCL.

3) **Will the new data be placed in the individual’s record?**

Yes

4) **Can the system make determinations about employees/public that would not be possible without the new data?**

No determinations are made about the public. As for employees, these determinations could be made using the data existing in the system. If an employee does not exist already in the system, then no determinations can be made.

5) **How will the new data be verified for relevance and accuracy?**

Output reports are reviewed for accuracy by the Bureau of Resource Management.

6) **If the data is being consolidated, what controls are in place to protect the data from unauthorized access or use?**

ACF2 provides the controls to protect the data from unauthorized access or use.

7) **If processes are being consolidated, are the proper controls remaining in place to protect the data and prevent unauthorized access? Explain.**

Yes. Only employees with a need to know are granted access to the records. Audit trails of users on the main frame are reviewed by the ISSO and by supervisors.

9) **How will the data be retrieved? Does a personal identifier retrieve the data? If yes, explain and list the identifiers that will be used to retrieve information on the individual.**

Yes. Many times the social security number is the identifier. Only authorized employees of the Bureau of Resource Management, and/or Human Resources can retrieve annuitant’s personal data.

10) **What kinds of reports can be produced on individuals? What will be the use of these reports? Who will have access to them?**

The kinds of reports that can be produced on individuals include accounting reports, tax reports, address reports, time and attendance data reports, and financial reports. These reports are used to review retirement benefits, to send tax reports to individuals for tax filing purposes, and to be available for review by the Bureau of Resource Management, and/or Human Resources.
E. MAINTENANCE AND ADMINISTRATIVE CONTROLS:

1) If the system is operated in more than one site, how will consistent use of the system and data be maintained in all sites?

The mainframe is operated at one site with an emergency backup at another site. Mirroring software is used to maintain consistency of the data.

2) What are the retention periods of data in this system?

99 years for retirement history data and 7 years for tax data.

3) What are the procedures for disposition of the data at the end of the retention period? How long will the reports produced be kept? Where are the procedures documented?

Reports are shredded, the data on the history tapes are eradicated and the tapes are crushed (after a certain period of time, archived or retired according to the Department’s Records Disposition schedule).

4) Is the system using technologies in ways that the DOS has not previously employed (e.g., monitoring software, Smart Cards, Caller-ID)?

Yes. Report.Web; e*Phone

5) How does the use of this technology affect public/employee privacy?

It does not affect public privacy. Sensitive but unclassified data on employees is reflected in the reports generated by Report.Web and by e*Phone.

6) Will this system provide the capability to identify, locate, and monitor individuals? If yes, explain.

Yes. Sensitive but unclassified data on employees is included in FARADS.

7) What kinds of information are collected as a function of the monitoring of individuals?

Sensitive but unclassified data on employees is included in the pay history. Information, such as name, social security number, pay information, etc.

8) What controls will be used to prevent unauthorized monitoring?

Monitoring is restricted to individuals granted access by the ISSO based on the supervisor’s recommendation for access level.
11) If the system is being modified, will the Privacy Act system of records notice require amendment or revision? Explain.
N/A

11) Are there forms associated with the system? YES ___ NO __ X___
If yes, do the forms include Privacy Act statements that include required information (e.g. – legal authorities allowing for the collection of the information being requested, whether provision of the information is mandatory or voluntary, the routine uses of the data, with whom the data will be shared, the effects on the individual if the data is not provided)? N/A

F. ACCESS TO DATA:

1) Who will have access to the data in the system (e.g., contractors, users, managers, system administrators, developers, other)?
Managers, system administrators, and developers have read access to the data. Only authorized users have read and change access. These people include Payroll Service Center personnel (Bureau of Resource Management, Retirements Accounts Division), accounting personnel, and Bureau of Human Resource Management personnel.

2) How is access to the data by a user determined? Are there criteria, procedures, controls, and responsibilities regarding access documented?
Yes, a Table-driven On-line Foundation Software (TOFS) Security Plan

3) Will users have access to all data on the system or will the user’s access be restricted? Explain.
User’s access is restricted to the access granted by the supervisor and ISSO.

4) What controls are in place to prevent the misuse (e.g., unauthorized browsing) of data by those having access (Please list processes and training materials)?
Preventing misuse is accomplished through several mechanisms including review of audit trails of who used the system for what purpose, the software places limits on the amount of adjustment that can be made to the pay, and the ISSO audits any activity on the local area network. Training is provided yearly as to the use and misuse of Sensitive but Unclassified data.
5) Are contractors involved with the design and development of the system and will they be involved with the maintenance of the system? If yes, were Privacy Act contract clauses inserted in their contracts and other regulatory measures addressed? Have rules of conduct been established and training regarding the handling of such information under the Privacy Act of 1974, as amended?

Yes, contractors are involved with the operation and maintenance of the system (this project is in the operation and maintenance phase. Yes, privacy act clauses are inserted into the contract. Rules of conduct have been established (this system is now 18 years old—rules of conduct were established many years ago). Yearly training is conducted by DS to remind employees of the rules of conduct regarding Sensitive but Unclassified information.

6) Do other systems share data or have access to the data in the system? If yes, explain.

Yes. The Bureau of Human Resource Management shares data with the payroll system.

7) Who will be responsible for protecting the privacy rights of the public and employees affected by the interface?

ISSO

8) Will other agencies share data or have access to the data in this system (Federal, State, Local, Other)?

N/A

9) If so, how will the data be used by the other agency?

N/A

10) Who is responsible for assuring proper use of the data?

ISSO
